**Subject:** Re: NATIONAL WARN Request: Lab Support Needed in WV

Hello David,

Thanks! I was not aware of the emails below.

Yes, ERLN/WLA are on alert. As planned utilities first contact their local lab support, as it seems they have done. In the event additional lab support is needed they should access the lab compendium for a list of labs and their capabilities or contact the EPA regional lab for assistance. Patti-Kay was included on the email chains therefore I am sure she or someone from her office has made contact.

To my knowledge as of Friday afternoon no request had come through ERLN/WLA for an official BOA for lab support however, an OSC was headed to the site. The BOA request would come from the region or an OSC. (\* Terry if you are aware of any updates please let me know)

If you have additional questions please do not hesitate to call. I will continue to remain on standby.

Latisha  
202-841-9745 (BB)

PS. The utility, state and region all have access to the compendium. As a back up a universal lab compendium user name and password is located in the WSD binder in the EOC for anyone to use.

#### NATIONAL WARN NOTICE - WIDE DISTRIBUTION

Many of you have likely seen reporting on the chemical spill in Charleston, WV which has impacted the drinking water for the American Water's treatment and distribution systems.

I received a request from American Water that they are seeking additional mobile lab support that can run samples for decision making support as they begin to take actions to clear the system.

The method and equipment specifications are attached.

Equipment - ThermoFisher GC/MS unit utilizes SM 524. The attached files includes the protocol utilized by Eastman, the chemical producer.

If you have this capability please contact [Ex. 6 - Personal Privacy] American Water, for further details and logistical arrangements.
